

Lucas Schottler

(763)-229-5934 | LucasSchottler@gmail.com | LucasSchottler.dev

Computer Science graduate with professional full-stack development experience. Specialized in building scalable automation systems, real-time web applications, and responsive user interfaces using modern technologies.

Education

Bachelor of Science in Computer Science, University of Minnesota - Twin Cities Dec. 2024, GPA 3.46

Freelance

E-Commerce Marketplace Automation Platform, Full Stack Developer August 2025 - Current

(Next.js, React, TypeScript, Spring Boot, Java, PostgreSQL, Amazon SP-API, eBay API)

- Developed full-stack automation platform with Next.js/TypeScript frontend and Spring Boot backend, synchronizing product listings across Amazon and eBay marketplaces with real-time progress tracking and bulk editing interface
- Built RESTful API with OAuth 2.0 integration for Amazon SP-API and eBay Inventory API, implementing automated token refresh, exponential backoff retry logic, and dynamic pricing algorithms with multiple tier calculations
- Implemented fuzzy search across database fields, batch PATCH operations with partial failure handling, and state management for long-running marketplace synchronization processes

Work Experience

Target Corporation: New Brighton, MN - Team Member May 2023 - Current

- Provide professional customer service across multiple departments, efficiently managing product placement and inventory
- Collaborate with management to optimize store operations, increase sales, and improve guest experience

University of Minnesota: Office of Information Technology - Technology Specialist June 2023 - Nov. 2024

- Delivered quality technical solutions for university infrastructure issues, communicating clearly with users of varying technical backgrounds
- Researched incidents to provide productive learning experiences while maintaining security, confidentiality, and reliability standards

Technical Skills

- **Programming Languages:** Java, Python, C, C++, C#, SQL, JavaScript/TypeScript
- **Frontend Technologies:** React.js, Next.js, Ember.js, TailwindCSS, HTML, CSS, UI/UX Design, Figma, Redux
- **Backend Technologies:** Spring Boot, Flask, Express, Node.js, Firebase/Firestore, PostgreSQL, RESTful APIs, Google Cloud Functions
- **Computer Science Concepts:** Data Structures & Algorithms, Computer Graphics, Operating Systems, Version Control/Git, Object Oriented Design, Machine Learning

Project Experience

Earthpol Insights, Full Stack Developer / Personal Project May 2025 - October 2025

(React.js, Next.js, Google Cloud Functions, TypeScript, Firebase, RESTful API)

- Developed full-stack web application visualizing server data through intuitive UI, serving hundreds of users
- Implemented dynamic pages for player profiles, group statistics, shops, and global analytics using Next.js and Firebase
- Leveraged server's RESTful API with Google Cloud Functions for performant single-page application with seamless backend integration

Portfolio Website, Frontend Developer / Personal Project Sep. 2023 - Current

(React.js, Next.js, TypeScript, TailwindCSS, Firebase, Github Actions)

- Transformed static Github.io page into dynamic web application through full-stack refactoring from vanilla HTML/CSS to React with TailwindCSS, improving code maintainability and enabling rapid feature implementation
- Built automated deployment pipeline using GitHub Actions for seamless Firebase hosting updates with Cloudflare integration
- Migrated to TypeScript for improved code organization and type safety, redesigning UI with focus on intuitive navigation and accessibility
